

### **Craig Dugan, Managing Director, Process Group**

Craig has over 20 years experience in the oil and gas industries, joining Process Group as graduate chemical engineer in 1987. Based in their Melbourne head office, Craig has been instrumental in the expansion of Process Group in procuring multi-million dollar contracts both here in Australia and the United Arab Emirates.

Craig also leads the development of Process Group's carbon capture technologies and continues to work alongside leaders in greenhouse gas technologies to significantly reduce greenhouse gas emissions.

**Process Group is a leading supplier of packaged process systems and complete process trains for a range of end-users including the oil and gas and petrochemical industries.**

Founded in 1978, Process Group's continued success is based on demonstrated excellence in all aspects of project execution.

The company has a team of highly motivated, experienced professionals who control all aspects of estimation, process design, detailed engineering, procurement, construction, fabrication and commissioning.

Process Group's technical staff includes engineers with backgrounds in mechanical, civil, chemical, electrical, instrument and process engineering, supported by a team of technical specialists such as CAD design, drafting, fabrication, construction and commissioning experts.

The company has large design and construction facilities in Melbourne and Abu Dhabi and a growing regional office in Singapore. With Worldwide staff of over 180 and an annual turnover of over AUD\$100 million the company is a World leader in gas processing, water treatment and more recently in carbon capture and storage technologies.
