

Inge Sarunic, Program Manager, GreenPower (Victoria)

Inge Sarunic is the Program Manager for GreenPower (Victoria) at Sustainability Victoria. She is responsible for the Marketing of the National Program and the management of the Victorian involvement in the GreenPower Program. GreenPower is a national program which allows individuals and businesses to take voluntary action in cutting their emissions and contributing to a larger renewable energy uptake in Australia.

Inge has always been interested in the renewable energy sector and recently she completed a Masters of Engineering in Sustainable Energy at RMIT to start her new career in this area. At RMIT she tutored undergraduates in research and sustainability and carried out some research for CSIRO on Energy storage.

Before working in the renewable energy sector she worked in civil construction for 14 years having originally completed a Bachelor degree in Civil Engineering in Denmark. In the construction Industry Inge worked as a Quality Management Representative for ConnectEast, as an Environmental, Safety and Quality Manager for MidWest Earthmovers and in various engineering roles for Boulderstone Hornibrook.
