

Mike Wheeler, Director of Engineering, Parsons Brinkerhoff UK

Mike Wheeler, Director of Engineering (UK) for Parsons Brinkerhoff, is a fellow of the Institution of Mechanical Engineers with 25 years of experience within the power generation industry.

PB is a leader in the development and operation of infrastructure to meet the needs of communities around the world. The firm provides strategic consulting, planning, engineering, and program and construction management services to both public and private sector clients.

He has extensive international experience of the development and implementation of thermal and renewable power generation projects, including one of the largest coal fired stations in the world presently being built (6 x 800 MW Medupi PS in South Africa).

He has been responsible for the provision of strategic advice (Board level) to large generating utilities and Government Departments, including his current role where he is leading PB's efforts acting as Technical Adviser to the UK Government (DECC) in support of the UK carbon capture and storage demonstration project.

In a similar capacity, Mike and his UK team are providing support to his PB Australia colleagues on CCS initiatives in Australia.
