

Peter Hanley, Division Director, Macquarie Capital Advisers Ltd

Peter Hanley is Division Director within Macquarie Capital's Utilities and Climate Change team, which is progressing initiatives in renewable energy generation, biosequestration, carbon markets, carbon capture & storage, and clean technology. Peter is currently actively involved in wind, solar and marine power projects, as well as in the development of low carbon emission technologies and clean coal opportunities, including carbon capture and storage.

Peter has almost 20 years experience in strategy, investment and management roles. Following seven years in management consulting, most of that time with Bain & Co, he joined Macquarie in 1999, initially as head of its central Strategy Unit. He then led Macquarie's investment activities in life sciences for two years before leaving Macquarie to take up the role of founding CEO of a venture-backed technology company. After five years leading that company, he returned to Macquarie in 2008 to take up responsibility for its Australian climate change activities.

Peter holds a BSc (Hons) in Biochemistry and PhD in Medicine from the University of Sydney. He has served on the Boards of various technology companies.
